The deviation is necessary to allow the bridge to remain in the closed-to-navigation position to facilitate testing of the emergency drive motors.

SUPPLEMENTARY INFORMATION: The Virginia Department of Transportation, who owns and operates the Berkley (U.S. 460/S.R. 337) Bridge across the Elizabeth River-Eastern Branch, mile 0.4, at Norfolk, VA, has requested a temporary deviation from the current operating regulation set out in 33 CFR 117.1007(b), to facilitate testing of the emergency drive motor on both spans of the bridge.

Under this temporary deviation, the bridge will remain in the closed-to-navigation position from 2:30 a.m. to 6 a.m. on October 28, 2018. The drawbridge has two spans, each with double-leaf bascule draws, and both spans have a vertical clearance in the closed-to-navigation position of 48 feet above mean high water.

The Elizabeth River-Eastern Branch is transited by recreational vessels, tug and barge traffic, fishing vessels, and small commercial vessels. The Coast Guard has carefully considered the nature and volume of vessel traffic on the waterway in publishing this temporary deviation.

Vessels able to pass through the bridges in the closed position may do so at any time. The bridge spans will not be able to open in case of an emergency and there is no immediate alternate route for vessels to pass. The Coast Guard will also

inform the users of the waterway through our Local Notice and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: October 19, 2018.
